

Interoperability PanEU

Genis

At the heart of e-Government

With PanEu service Genis has simplified procedures for immigration, studying or employing in Slovenia to European Union citizens.

[e-Government]

PanEU web service enables European citizens fast and easy obtaining of permanent or temporary residence in the Republic of Slovenia by using verified digital certificate.

Friendly public administration

PanEU service enables holders of verified digital certificate permanent or temporary residence registration without visiting Administration Unit. By simple procedure on portal of Republic of Slovenia, applicant obtains needed Slovenian identifiers, such as PIN and tax number, and registers his or her residence in Register of Permanent Population. With acquired Slovenian identifiers user can also use all other electronic services of Slovenian public administration.

Work simplification

PanEU enables faster submission of application for obtaining residence to EU citizens and shortens public administration procedures at the same time. Namely service automates the procedure of determining PIN in Central Population Register and tax number in Tax Register, which is the condition for obtaining residence. After obtaining both numbers, entry of data into Permanent or Temporary Residence Register is carried out.

Innovative solution

PanEU is designed on the basis of service oriented architecture (SOA). Entire web service includes application on portal of the Republic of Slovenia and connections with Verified Web Digital Certificate Register, Central Population Register, Tax Register and Register of Permanent Population. All procedures are adjusted and entirely automatic; applicant receives obtained identifiers in his or her electronic mailbox.
