

Interoperability IO-Kindergartens

At the heart of e-Government

Genis has enabled Slovenian local government to improve productivity and the quality of work upon determining kindergarten payment.

IO-Kindergartens ensures Slovenian community officials efficient obtaining of data from national records for deciding on reduced kindergarten payment applications.

Quality information for decision making

IO-Kindergartens offers community officials self-service information on the credit standing of reduced kindergarten payment applicants. Instant access to information on an applicant's financial and social situation enables a substantial speeding up of decision making and improves the transparency of official's decisions.

Unified data for local government

Through IO-Kindergartens system community officials can access data from Central Population Register and records from Tax Administration of Republic of Slovenia, Ministry of Labour, Family and Social Affairs and Employment Service of Slovenia. Access to national data sources is in compliance with existing legislation and is secured with the most up-to-date methods of information safety.

Innovative solution

IO-Kindergartens system operates as a process within a national interoperability backbone. This system receives a users' demands through friendly web interface. The interface is a part of service module which, at the same time takes care of accepting demands from other applications, converting data and safety.
